PROFESSIONAL SUMMARY

DevOps Engineer with over 3 years of hands-on experience designing secure, scalable cloud infrastructure and automating software delivery across Microsoft Azure, AWS, and Google Cloud Platform. Experienced in Docker, Kubernetes, Terraform, Azure DevOps, GitHub Actions, GitLab CI, Jenkins, Python, Bash, and Linux administration, with a strong focus on Infrastructure as Code, CI/CD automation, observability, and DevSecOps. Proven ability to improve deployment reliability, strengthen cloud security, and build resilient cloud environments that enable engineering teams to deliver software faster and with confidence.

CORE SKILLS

Cloud Platforms: AWS • Microsoft Azure • Google Cloud Platform

Infrastructure as Code: Terraform • CloudFormation • ARM Templates • Crossplane • Ansible

CI/CD: GitHub Actions • GitLab CI • Azure DevOps • Jenkins • AWS CodePipeline • ArgoCD

Containers & Orchestration: Docker • Kubernetes (EKS, AKS, GKE) • Helm • OpenLens

Scripting & Linux: Python • Bash • PowerShell • Linux Systems Administration

Observability: Prometheus • Grafana • Loki • Datadog • CloudWatch • OpenTelemetry • Looker Studio

Security in Pipeline: OWASP ZAP • SonarQube • Trivy • Sonatype Nexus

Databases & Data: MySQL • Azure MySQL • BigQuery • GCP Log Router • ElasticSearch

PROFESSIONAL EXPERIENCE

The VR Superstore Corp. | Remote | United States

October 2025 – Present

DevOps Engineer — Volunteer

- Designed and standardized reusable CI/CD pipelines using Azure DevOps and GitHub Actions, enabling consistent build, test, and deployment workflows while reducing deployment failures by 40%.
- Deployed and managed full observability stack (Prometheus, Loki, Grafana) with alerting runbooks, reducing mean time to detect incidents by 35%; implemented Azure Backup and Velero for disaster recovery.
- Provisioned and maintained secure Azure cloud infrastructure with Terraform, supporting high-availability VR/AR workloads.

SWEN — AI Infrastructure Platform | Remote | UK

March 2025 – September 2025

DevOps Engineer — Contract

- Automated multi-cloud infrastructure provisioning across AWS and Alibaba Cloud using Terraform and Crossplane, managed via GitLab CI and ArgoCD GitOps
- Built monitoring framework with Prometheus, Grafana, and OpenTelemetry; applied FinOps rightsizing and cost-allocation tagging delivering 25% monthly cloud cost reduction.

My Virtual Resources | Remote | United States

July 2024 – December 2024

Cloud Systems Engineer — Contract

- Managed Linux-based cloud servers, firewall rules, and NordLayer VPN across client environments, maintaining 99.9% uptime through proactive patching and configuration management.
- Deployed SentinelOne endpoint protection, DNS filtering, and automated patch management; administered Microsoft 365 tenant including user provisioning and email security hardening.

Digital Witch | Remote | Nigeria

January 2024 – May 2024

DevOps Engineer — Internship

- Provisioned and managed Kubernetes clusters across AWS (EKS), Azure (AKS), and GCP (GKE) using Terraform and Helm.
- Supported CI/CD pipelines across AWS CodePipeline, Azure DevOps, and GitHub Actions, enabling faster and safer releases.
- Built GCP log analytics workflow using Log Router, BigQuery, and Looker Studio; supported alerting and incident notifications.

Steghub | Remote | UK

July 2023 – December 2023

Junior DevOps Engineer — Internship

- Maintained Jenkins CI/CD pipelines and supported AWS infrastructure deployments, improving pipeline throughput.
- Developed Python and Bash automation scripts to standardize Linux configuration management and reduce manual operational effort.
- Containerized supporting services with Docker to ensure consistent dependencies across environments.

Independent Client | Remote

January 2025 – February 2025

Cloud Engineer — Freelance

- Built a real-time event-driven webhook system on GCP: Pub/Sub ingested email events, Cloud Functions processed and delivered webhooks, Cloud Run provided scalable serverless execution — fully automated.

TECHNICAL PROJECTS

Self-Healing Multi-Cloud GitOps + AIOps Platform | [GitHub](#)

- AI-driven GitOps platform using Terraform and ArgoCD that auto-routes workloads across cloud providers by cost and latency — 99.9% uptime, 25% cost reduction, infrastructure changes triggered by Git commits.

Secure CI/CD DevSecOps Pipeline | [GitHub](#)

- Automated serverless Node.js API pipeline with SAST (CodeQL), DAST (OWASP ZAP), CloudFormation change sets, and rollback automation — sub-3-minute deploys end-to-end.

Sonatype Nexus Supply Chain Security | [GitHub](#)

- Hardened CI/CD supply chain with Nexus as trusted artifact source, Trivy and Gype CVE scanning, Cosign image signing (100% signed), and a live Grafana pipeline security dashboard.

CERTIFICATIONS

Google Cloud – Professional Cloud Security Engineer — Google Cloud

May 2025

Kubernetes and Cloud Native Essentials (LFS250) — CNCF / Linux Foundation

April 2026

Foundations of Cybersecurity — Coursera

August 2025

EDUCATION

B.Sc. Economics — Michael Okpara University of Agriculture, Umudike

November 2023
